DIC LABS & STUDIOS

DIGITAL IMAGING CENTER

Welcome to the Digital Imaging Center, where students can develop ideas, explore creative tools, and bring projects to life. Begin on the fifth floor at 209 East 23rd Street to discover equipment checkout, the Photo Studio, iMac labs, professional software, and staff support.

1. Equipment Room & Checkout

Equipment Room 507B is located in the fifth-floor reception area. We use **WebCheckout** to manage loans. Bring your **SVA ID** to the front desk; students must check out and return their own equipment in person.

EQUIPMENT	WHAT STUDENTS CAN USE
Canon cameras	Full-frame Canon R8 cameras.
Sony cameras	Sony α7R IV full-frame cameras for 60+ MP photography and 4K video.
Lenses	24–70 mm, 70–200 mm, and 150–400 mm lens options.
Additional gear	Gimbals, camera accessories, lighting tools, sound equipment, laptops, iPads, and more.

2. Photo Studio · Room 509

Room 509 is a spacious studio for portraits or photographing props, books, and projects. The lighting setup includes **two softboxes**, reflectors, grids, and more. Get started with a **Photo Studio workshop** to learn how to use the space, lighting, and equipment.

To book, open the DIC Tools booking page, choose **Photo Studio**, and select a date and time.

3. iMac Workstations & Locations

Our labs feature **Apple M-series iMac workstations** with professional creative software for graphic design, photo and video editing, animation, and 3D modeling. Students can develop ideas, refine coursework, and prepare files for presentation or printing.

8 computer labs · 2 studios · Club Haus

The **11 labs and creative spaces** listed below span four floors and include the Print Studio, Photo Studio, and Club Haus (Room 206). Check Classroom Lookup for scheduled classes before choosing a room.

LOCATION	LABS & SPACES
First floor	Print Studio.
Second floor	Club Haus (Room 206) · Labs 209 & 210.
Fifth floor	Labs 506, 508, 510, 511, and 512 · Photo Studio 509.
Sixth floor	Lab 605.

Scanners · Scanners are available throughout the labs for digitizing artwork, photographs, and documents.

4. Creative Software

Students can use the labs to design, edit photos and video, create animation and 3D models, and explore AI-assisted tools. The software below supports projects from early ideas to finished work.

SOFTWARE	WHAT YOU CAN CREATE
Adobe Master Suite	Graphic design, photo editing, page layout, video, and motion graphics.
Maxon One	Cinema 4D, Redshift, ZBrush, and Red Giant for 3D, animation, rendering, sculpting, and visual effects.
Blender & SketchUp Pro	3D modeling and spatial design.
Glyphs 3 & Visual Studio Code	Type design and creative coding in selected labs.
AI Creative Tools	AI-assisted image creation, editing, and creative experimentation.

Software availability varies by lab.

5. Get Started

Visit the SVA DIC website and open **DIC Workshops** to book a workshop or studio time.

Staff support · Ask the front desk for help using the labs, scanning work, finding resources, or checking out equipment.

Lab essentials · Bring your SVA ID. Save and back up work to your own storage or cloud account. Keep shared areas clean, use headphones, and ask staff before changing computer or equipment setups.
